

FAZLY RAHI

Computer Science & Engineering Undergraduate

fazlyrahi@gmail.com | 01560016495

[LinkedIn](#) | [GitHub](#) | [Portfolio](#)

PROFILE

Final-stage Computer Science and Engineering student with a strong academic record and a practical foundation in programming, data structures and algorithms, object-oriented development, backend work with databases, and mobile application development for Android and iOS. Seeking opportunities to apply and grow these skills in a professional software environment.

EDUCATION

B.Sc. in Computer Science and Engineering	Ongoing
American International University-Bangladesh (AIUB) • Currently in 10th semester	
Higher Secondary Certificate (HSC)	GPA 5.00 / 5.00
Govt. Science College, Tejgaon, Dhaka	
Secondary School Certificate (SSC)	GPA 5.00 / 5.00
Bindu Basini Govt. Boys' High School	

TECHNICAL SKILLS

Languages	C, C++, Java, C#, Kotlin, Dart, HTML, CSS, JavaScript (basic)
Core Computer Science	Data Structures, Algorithms, Object-Oriented Programming, Operating Systems (Linux basics)
Backend & Databases	.NET, database design, basic query writing, database connectivity in C#, MongoDB (beginner)
Mobile Development	Android Studio (Kotlin), Flutter (Android and iOS)
Embedded Systems	Arduino
Tools & Practices	Git, GitHub (commit, push, pull), SRS documentation, command-line compilation and execution

PROGRAMMING FOUNDATION

- Began programming with C and C++ and completed the fundamentals of programming through the **Phitron** learning platform.
- Completed coursework and training in **Data Structures** and **Algorithms**.
- Studied OOP principles in **Java**, followed by OOP concepts and C# fundamentals.
- Learned the basics of **MongoDB** through the CodeWithHarry course.

PROJECTS

Weather Update App

Flutter

- Built a cross-platform weather application that runs on both Android and iOS.
- Tested on multiple Android devices including Realme, Xiaomi, Nothing, Tecno and Walton.

Simple Calculator App

Kotlin, Android Studio

- First Android project, developed in Android Studio using Kotlin.

Object-Oriented Applications

Java, C#

- Developed entry-level projects applying inheritance, encapsulation and other OOP principles.
- Created and compiled projects using Notepad++ and the command line, in both Java and C#.

Database-Connected Backend Project

C#, .NET

- Worked on backend development with a database, writing basic queries and connecting the database to a C# project.

Arduino Embedded System Project

Arduino

- Gained hands-on experience building an embedded systems project using Arduino.

Personal Portfolio Website

HTML, CSS, JavaScript

- Designed and built a personal portfolio website: rahi-12.github.io/portfolio.

SOFTWARE ENGINEERING KNOWLEDGE

- Software process models: **Waterfall**, **V-Model** and **Agile**.
- Beginner-level knowledge of **Scrum** and **risk management**.
- Familiar with preparing **Software Requirements Specification (SRS)** documentation.
- Basic version control with Git and GitHub: commit, push and pull.
